 TRUNG THANH CAO

 Front-End Developer

 082 6966 913

SUMMARY

Strategic Front-end Developer with over 4 years of expertise in developing high-performance web solutions using Vue.js (Nuxt.js) and React (Next.js). I specialize in creating scalable, responsive web applications while maintaining clean, maintainable code to ensure long-term project stability. Beyond technical proficiency, I am committed to team excellence through mentorship and code reviews. Passionate about optimizing user engagement through superior UI performance, SEO-friendly architectures, and modern technologies like GSAP and Headless CMS.

EXPERIENCE

Sweet Soft Solution · Intern Front-end Developer

From 04/2020 to 07/2020

Project: Paradies Nha Trang Hotel

Main Responsibilities: Designed and developed the hotel website interface using React. Customized the theme and UI to align with the hotel's branding and improve the user experience.

JAMStack Vietnam · Middle Front-end Developer

From 12/2021 to 08/2025

Project:

- **Scale & Diversity:** Successfully implemented and launched 30+ websites catering to various business scales and industries.
- **Key Portfolio:** Delivered high-quality web solutions for prominent brands such as Rang Dong Store, TTC Land, Runam, Apollo Silicone, Jungle Boss, Biox, Rallismart, Love + Rosa, and Gik.
- **Technology Stack:** Strategically utilized Vue (Nuxt.js) and React (Next.js) based on specific project requirements to ensure optimal technical solutions.

Main Responsibilities:

- **Scalable Architecture:** Built and maintained core front-end functions using Nuxt.js and Next.js, focusing on creating scalable, responsive web applications while ensuring clean, maintainable code.
- **System Deployment:** Developed and deployed modern user interfaces on pre-built systems, ensuring strict adherence to customer requirements and high-quality standards.
- **Cross-functional Collaboration:** Partnered with UI/UX Designers to enhance usability and worked alongside Back-end Developers to ensure seamless data integration and system performance.
- **Performance & SEO:** Implemented advanced SEO optimization, systematic debugging, and performance tuning to enhance website stability and loading speeds.
- **Technical Quality:** Applied modern front-end architectures to improve project long-term maintainability and user engagement through superior UI performance.

EDUCATION

Telecommunications University

From 09/2016 to 07/2020

- Bachelor's Degree – GPA: 7.2/10 (Good)
